

FEET FLEX™

STATIONARY STEPPER

Walk while you sit

Improve your blood circulation while you sit!

FeetFlex, an amazing innovative solution for prolonged sitting and walking limitations.

- **FeetFlex** ideal, compact, effortless exerciser - just sit down and relax, while your feet are walking for you.
- No physical effort, no strength required.
- The **FeetFlex** can be used by all, young and old, healthy and infirm.
- **FeetFlex**, ideal for flights, car and bus travel, any long distance travel and in your office.

Acceleration Of Blood Flow

Using **FeetFlex** can:

- Improve blood circulation
- Help prevent swollen ankles and feet
- Relieve the numb and tired feeling in your legs
- Reduce the risk of contracting deep vein thrombosis (DVT), commonly known as "Economy Class Syndrome"

FeetFlex keep you feeling fresh and healthy.

FeetFlex keep you feeling fresh and healthy

Actual femoral vein blood velocity at rest and during the use of the **FeetFlex**

Monitored and recorded during a diagnostic duplex scan
